Learn through Experience

Belum is one of those natural wonders in Malaysia. If you want a green nature adventure Belum is the place for you. You can learn about the magical belum-temenggong rainforests whilst helping to keep an eye out for signs of human encroachments.

As Belum is based around the Temenggong lake this is certainly a wet jungle experience. During our Banding Island challenge you will spend a day on the lake and forests solving tasks. Who is the best jungle survival team? We will find out.

There are over 7,000 indigenous people living in Belum-Temenggong. There are several lake side villages whom you can learn from and help. These people are amazing and will teach you more about the forest in half a day than any scientist can.

Belum is a place which will touch your inner soul and satisfy anyone's sense of adventure.

Eco-Talks at Your School/University

Did you know that we can host relevant environmental lessons and eco-talks to your students, at your school or via skype? Our specialties lie in marine and rainforest conservation, but we have a lot of in-house professionals who can provide sessions about many more topics...

ADVENTURE!!

Jungle Trekking, caving, abseiling, rock climbing and tubing then cool off in the river.

- The beautiful surroundings offer limitless opportunities to explore!
