Learn through Experience

Knowledge is best gained when you experience it yourself.

Become a proud certified PADI Scuba diver and discover a whole new world underwater. Play your part in collecting data for Global Coral Watch database run by the University of Queensland.

Have the opportunity to learn about sharks and turtles and how to identify them individually.

Follow us on our weekly beach clean up where we collect and weigh trash washed up ashore and see the impact littering can affect our ecosystem and the environment.

This experience can only inspire one to do more and waste less.

Join Ecoteer on your next Discovery Week and be part of something that is taking small but impactful steps towards helping the marine life and the communities of the Perhentian Islands.

*A Typical
9Day 8Night*
