Get ready for an adventure service trip of a lifetime!!

Experience Jogja in the raw!

Its people, its simply delicious food, its cave tubing and help its wildlife - orang-utans, gibbons and more. Your team will help at the rescue centre which is famous for successfully rehabilitating many birds and small mammals and as a rescue centre for larger animals.

Your students will play a tangible part in helping these animals which have been caught in the illegal wildlife trade. A sad and touching experience that generates a fire in the belly and urge to help them.

You will also go to the beach for some R&R and learning about the local coastal communities and help them with their interesting farming techniques.

The adventure is then spiced up with a truly unique experiential day. Tandem abseil down into a cave, yes down! Then brave the rapids in the dark and light through the cave system! A truly awesome day!

Finally visit the temples of Borobudur - the largest buddhist temple in the world. Eventually, shop till you drop or at least until the plane departs.

Jogjakarta, a place that will win your heart, an adventure you will always remember.

ECO-TALKS AT YOUR SCHOOL / UNIVERSITY

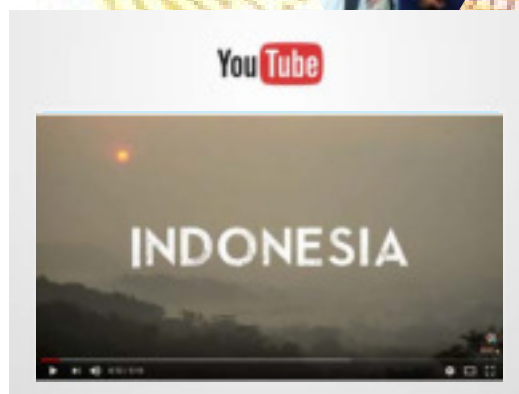

Did you know that we can host relevant environmental lessons and eco-talks to your students at your school or via skype?

Our specialties lie in marine and rainforest conservation, but we have in-house professionals who can provide sessions about various other topics.

This project has been fully risk assessed and this is available upon request.

We take pride in our health and safety record, and only offer projects which are committed to high levels of health and safety.

Fostering global citizenship in volunteers
Learn about illegal wildlife trade, conservation issues and poaching.
